

Salah Uddin Selim

Computer Science & Engineering Student | Software Engineer

+880 1871-888260 | sselim223512@bscse.uiu.ac.bd | github.com/salahuddinselim | Dhaka, Bangladesh

SUMMARY

CSE student at United International University (GPA 3.68/4.0) with hands-on experience in full-stack web development, IoT systems, and algorithm design. Built 5 production-quality projects across Java, Python, PHP, C/C++, and Arduino. Award-winning project (6th Runner-Up, UIU Spring 2025). Seeking software engineering or research roles to build scalable, impactful solutions.

TECHNICAL SKILLS

Languages	Python, Java, C, C++, PHP, JavaScript, HTML, CSS
Frameworks	JavaFX, Bootstrap, SpeechRecognition, Pyttsx3
Databases	MySQL, File I/O
Hardware & IoT	Arduino, DS18B20, pH/Turbidity/Ultrasonic Sensors, L298N Motor Driver, Servo Motors
Tools	Git, GitHub, IntelliJ IDEA, Arduino IDE, VS Code, Scene Builder
Concepts	OOP, Multithreading, Socket Programming, DSA, MVC, REST APIs

PROJECTS

Multilevel Puzzle Solving Game 6th Runner-Up, UIU *Java, JavaFX, MySQL, Socket Programming* Spring 2025

- Architected a team-based desktop app with 5 logic games (Tower of Hanoi, Jigsaw, Crossword, Number Guess, Color Mapping) and shared progression synced across 3-member teams via MySQL.
- Implemented real-time group chat with Java Socket Programming and multithreading; built all GUIs using JavaFX + Scene Builder (FXML).
- Engineered collaborative level-unlocking: any team member's completion instantly unlocks that level for the whole team.

Tournament Management System — TournyMate *PHP, MySQL, Bootstrap, JavaScript* Fall 2024

- Built a full-stack web platform for end-to-end tournament administration — registration, automated bracket scheduling, live score updates, and role-based admin controls.
- Developed secure PHP/MySQL backend with player profiles, performance tracking, and admin moderation (delete players/tournaments, read messages).

Automated Fish Pond Monitoring System *Arduino, C++, IoT* Summer 2024

- Deployed smart IoT system with 5 sensors (temperature, pH, turbidity, gas, ultrasonic) on Arduino; automated corrective actions — water exchange, pH balancing, food dispensing — via servo motors and L298N drivers.
- Eliminated manual intervention through closed-loop C++ control logic that reads thresholds and fires actuators in real time.

github.com/salahuddinselim/Automated-Fish-Pond

AI Voice Assistant *Python, SpeechRecognition, Pyttsx3, Google API*

- Built a Python voice assistant with NL speech parsing, TTS output, real-time web search (Google Custom Search API), OS automation, reminder scheduling, and joke generation (PyJokes).

github.com/salahuddinselim/Voice-Assistance

Player Information System — Bangladesh Cricket Team *C, Structures, File I/O*

- Developed a menu-driven CLI in C to manage player stats (batting avg, experience, match records) with O(n) search, sort, and statistical queries (top scorer, most experienced) using structures and file handling.

EDUCATION

United International University — B.Sc. in Computer Science & Engineering 2022 — Present
Dhaka, Bangladesh GPA: 3.68 / 4.00 (112 / 137 credits)

Pirganj Govt. College — Higher Secondary Certificate (HSC) 2018 — 2020
Pirganj, Thakurgaon GPA: 5.00 / 5.00

Pirganj Pilot High School — Secondary School Certificate (SSC) 2013 — 2018
Pirganj, Thakurgaon GPA: 5.00 / 5.00

ACHIEVEMENTS & LANGUAGES

6th Runner-Up — UIU Software Project Competition, Spring 2025 (Puzzle Solving Game)

Perfect GPA — 5.00/5.00 in both HSC and SSC examinations

Languages: Bangla (Native) | English (Professional Working Proficiency)
